Hiring Team
Data Engineer
Globex Data
San Francisco, CA

Dear Globex Data Team:

I am excited to apply for the Data Engineer role at Globex Data. Turning messy source data into clean, dependable datasets is the work I enjoy most, and your data platform team sounds like exactly the kind of high leverage place where I want to build.

My experience maps closely to what you need. At Sample Labs I developed a Python data ingestion pipeline that processed two million records per day at 99.9 percent reliability. At Example Corp I designed PostgreSQL data models, tuned SQL queries behind an internal dashboard, and shipped services on AWS, while raising backend test coverage from 55 percent to 88 percent. I am comfortable with Python, SQL, ETL pipelines, and AWS services such as S3 and Lambda, and I care about data quality, testing, and monitoring.

I would welcome the chance to contribute to your pipelines and datasets. Please reach me at +1-555-0100 or jane.doe@example.com.

Sincerely,

Jane Doe
