SUMMARY

Data engineer building reliable **ETL** and ingestion pipelines in **Python**, with strong **SQL** and **PostgreSQL** data modeling. Experienced operating data systems on **AWS** with automated testing and monitoring.

EXPERIENCE

Software Engineer

Example Corp

Jun 2024 to Present

San Francisco, CA

- Built and shipped **12** backend endpoints over **PostgreSQL**, cutting average response time by **35%** through query optimization and caching.
- Designed **PostgreSQL** data models and tuned **SQL** queries powering an internal dashboard used by **500** users.
- Migrated a legacy module to a **Dockerized** service on **AWS** ECS, reducing deployment time from **40 minutes to under 8 minutes**.
- Raised backend test coverage from **55% to 88%** with **200+** tests, reducing production incidents by **30%**.

Software Engineering Intern

Sample Labs

Jun 2023 to Aug 2023

Remote

- Developed a **Python** data ingestion pipeline that processed **2M** records per day at **99.9%** reliability.
- Wrote automated tests that caught **15** regressions before release, improving sprint velocity by **10%**.

Teaching Assistant

Example University

Sep 2022 to May 2023

San Francisco, CA

- Led weekly lab sections for **60** students in an introductory programming course, improving average exam scores by **12%**.
- Held office hours and resolved **90%** of student questions without escalation to the instructor.

PROJECTS

- Sample CLI Toolkit (Open Source)** | A **Python** command line toolkit for batch file processing and **CSV** transformation, packaged for pip with **90%** test coverage.
- Example Task Tracker (Open Source)** | Full stack app with a **FastAPI** backend and **PostgreSQL** persistence, featuring JWT auth.

SKILLS

Languages: Python, SQL, TypeScript, JavaScript, Java

Data & Pipelines: PostgreSQL, ETL, data ingestion, data modeling, REST APIs

Cloud & DevOps: AWS (S3, Lambda, EC2, ECS), Docker, GitHub Actions, CI/CD, Linux

Backend: FastAPI, Node.js, Redis

EDUCATION

Example University

Bachelor of Science in Computer Science, GPA: 3.9/4.0

San Francisco, CA

Aug 2020 to May 2024

- Databases, Distributed Systems, Data Structures and Algorithms, Operating Systems, Web Application Development

LEADERSHIP & AWARDS

- Computer Science Club, President** Sep 2022 to May 2023
Led a student club of **80** members, organizing **10** technical workshops and growing event attendance by **40%** year over year.
- Awards:** AWS Certified Cloud Practitioner, Hackathon Winner
