SUMMARY

Full stack software engineer shipping end to end web applications with **React**, **FastAPI**, and **Node.js** backed by **PostgreSQL**. Comfortable across the stack, from **REST** and **GraphQL** APIs to containerized **AWS** deployments with automated **CI/CD**.

EXPERIENCE

- Software Engineer**
Example Corp

Jan 2024 to Present
San Francisco, CA

 - Shipped an end to end **React/FastAPI** platform serving **10,000+** users at **99.9% uptime** with automated **CI/CD**.
 - Designed **REST** and **GraphQL** APIs with **OAuth 2.0**, reducing average response latency from **800ms to 200ms**.
 - Built a **Python ETL** pipeline processing **1M+** records daily, improving query performance by **40%**.
- Software Engineering Intern**
Sample Labs

Jun 2023 to Aug 2023
Remote

 - Migrated a legacy service to **Docker** and **Kubernetes**, cutting deploy time from **20 minutes to 3 minutes**.
 - Automated end to end tests for **50+** pages with **Selenium** in **CI/CD**, lifting defect detection by **60%**.

PROJECTS

- Example Project (Open Source)** | Event driven app on **AWS** (Lambda, S3, DynamoDB) with **Next.js** and **PostgreSQL**.
- Sample Tool (Personal)** | Built a **FastAPI** and **React** tool with **Redis** queues and sandboxed **Docker** execution.

SKILLS

Languages: Python, TypeScript, JavaScript, Java, SQL, Bash
Frontend: React, Next.js, Redux, Tailwind CSS, HTML5/CSS3
Backend: FastAPI, Node.js, Express, Flask, Django, REST, GraphQL, OAuth 2.0
Data & Cloud: PostgreSQL, MySQL, Redis, DynamoDB, S3, AWS (Lambda, EC2, ECS)
DevOps: Docker, Kubernetes, Terraform, GitHub Actions, CI/CD, Nginx

EDUCATION

- Example University**
Bachelor of Science in Computer Science, GPA: 3.9 / 4.0

San Francisco, CA
Aug 2020 to May 2024

 - Data Structures, Algorithms, Distributed Systems, Database Management, Software Engineering

LEADERSHIP & AWARDS

- Computer Science Club, President**
Led a team of board members; organized hackathons and technical workshops.
- Awards:** Hackathon Winner, Dean's List
