Hiring Team
Backend Engineer
Northwind Systems
San Francisco, CA

Dear Northwind Systems Team:

I am excited to apply for the Backend Engineer role at Northwind Systems. I build reliable backend services and enjoy owning APIs from schema design through production rollout, which is exactly the kind of work your platform team does on a high volume data platform.

I am a backend engineer with experience in Python and FastAPI on PostgreSQL. I have designed REST and GraphQL APIs and cut average latency from 800ms to 200ms, built a Python pipeline processing over a million records a day while improving query performance by 40 percent, and shipped microservices on AWS with automated CI/CD. I am also comfortable with Docker, Kubernetes, and Redis.

I would welcome the chance to bring this backend and API experience to Northwind Systems. Please reach me at +1-555-0100 or jane.doe@example.com.

Sincerely,

Jane Doe
