EXPERIENCE

- Software Engineer**
Example Corp

Jan 2024 to Present
San Francisco, CA

 - Designed **REST** and **GraphQL** APIs with **OAuth 2.0** on **FastAPI**, reducing average response latency from **800ms** to **200ms**.
 - Built a **Python** **ETL** pipeline processing **1M+** records daily and improved query performance by **40%** through **PostgreSQL** tuning.
 - Shipped a **FastAPI** platform serving **10,000+** users at **99.9% uptime** with automated **CI/CD** on **AWS**.
- Software Engineering Intern**
Sample Labs
