Hiring Team
Cloud Engineer
Stark Industries
San Francisco, CA

Dear Stark Industries Team:

I am excited to apply for the Cloud Engineer role at Stark Industries. I enjoy building reliable, cost efficient infrastructure on AWS and automating the work that keeps services healthy.

I have deployed containerized services to AWS ECS and EC2, cutting deployment time from 40 minutes to under 8 minutes, and I build CI/CD pipelines with GitHub Actions that automate build, test, and deploy. I manage infrastructure as code with Terraform, work daily with Docker and Linux, and I am an AWS Certified Cloud Practitioner. I also focus on reliability, having reduced production incidents by 30 percent through stronger testing.

I would welcome the chance to help your team scale responsibly and keep cloud spend in check. Please reach me at +1-555-0100 or jane.doe@example.com.

Sincerely,

Jane Doe
