Hiring Team
Frontend Engineer
Umbrella Web
San Francisco, CA

Dear Umbrella Web Team:

I am excited to apply for the Frontend Engineer role at Umbrella Web. I build responsive, well tested user interfaces, and I care about turning clean designs into reliable components that users enjoy.

I work day to day in React, Next.js, and TypeScript, styling responsive UIs with Tailwind CSS and managing state with Redux. At Example Corp I built a React dashboard used by 500 internal users and shipped a React platform serving more than 10,000 users at 99.9 percent uptime. I have integrated frontends with REST and GraphQL APIs and kept the UI green with automated tests in CI/CD.

I would welcome the chance to contribute to your frontend team. Please reach me at +1-555-0100 or jane.doe@example.com.

Sincerely,

Jane Doe
