Hiring Team
Machine Learning Engineer
Vortex AI
San Francisco, CA

Dear Vortex AI Team:

I am excited to apply for the Machine Learning Engineer role at Vortex AI. I build and train models in Python and PyTorch, and I care about rigorous evaluation and clean data pipelines that hold up in production.

As a machine learning engineer, I have trained PyTorch ranking models that improved offline evaluation metrics by 14 percent, designed batch and streaming data pipelines in Spark and Airflow over 200M records, and stood up a reproducible model evaluation harness with held out splits and slice based metrics. I have also handled feature engineering on noisy datasets and deployed models behind a FastAPI service on AWS with drift and latency monitoring.

I would welcome the chance to support your team across the full model lifecycle. Please reach me at +1-555-0100 or jane.doe@example.com.

Sincerely,

Jane Doe
