SUMMARY

Machine learning engineer who builds and trains models in **Python** and **PyTorch**, designs **data pipelines**, and runs rigorous **model training and evaluation**. Comfortable across the lifecycle from **feature engineering** to deploying models to production on **AWS**.

EXPERIENCE

Machine Learning Engineer <i>Example Corp</i>	Jun 2024 to Present <i>San Francisco, CA</i>
- Built and trained PyTorch ranking models that improved offline model evaluation metrics by 14 percent over the prior baseline. - Designed batch and streaming data pipelines in Spark and Airflow that fed daily training jobs over 200M records. - Stood up a reproducible model evaluation harness with held out splits and slice based metrics to catch regressions before release. - Deployed models behind a FastAPI service on AWS and added drift and latency monitoring to keep production inference healthy.	
Data Science Intern <i>Sample Labs</i>	Jun 2023 to Aug 2023 <i>Remote</i>
- Prototyped a scikit-learn classifier for support ticket routing that reached 0.91 macro F1 on a held out test set. - Cleaned and labeled a noisy dataset of 1.2M rows and documented the feature engineering steps for the team to reuse. - Wrote SQL and pandas notebooks that surfaced three actionable insights adopted by the product team.	

PROJECTS

- Recommender Sandbox** | A **PyTorch** playground comparing matrix factorization and two tower retrieval on a public ratings dataset.
- Open Model Eval Toolkit** | A small **Python** library for slice based **model evaluation** with confusion matrix and calibration reports.

SKILLS

Languages: Python, SQL, Java, TypeScript
ML & Data: PyTorch, scikit-learn, pandas, NumPy, Spark, Airflow
Infra & Tools: AWS, Docker, FastAPI, MLflow, Git

EDUCATION

Example University <i>BS Computer Science, GPA: 3.9/4.0</i>	San Francisco, CA <i>Aug 2020 to May 2024</i>
Machine Learning, Probability, Linear Algebra, Distributed Systems	

LEADERSHIP & AWARDS

- ML Reading Group Lead**
Organized a weekly paper reading group of 20 students covering recent **deep learning** research.
- Awards:** Dean's List
