Hiring Team
Software Engineer, New Grad
Wonka Labs
San Francisco, CA

Dear Wonka Labs Team:

I am excited to apply for the Software Engineer, New Grad role at Wonka Labs. I am an early career engineer with strong computer science fundamentals and a genuine eagerness to learn across any part of the stack, and your team first culture is exactly where I want to grow.

I write reliable, well tested code end to end in Python, TypeScript, and Java. At Example Corp I shipped REST API endpoints with FastAPI and PostgreSQL, built a React and TypeScript dashboard used by 500 internal users, and raised backend test coverage from 55 percent to 88 percent. As an intern at Sample Labs I built a Python data pipeline processing 2 million records a day, and as a teaching assistant and Computer Science Club president I learned to collaborate, mentor, and communicate clearly.

I would welcome the chance to contribute to Wonka Labs and keep learning alongside your engineers. Please reach me at +1-555-0100 or jane.doe@example.com.

Sincerely,

Jane Doe
