SUMMARY

New grad **software engineer** with strong CS fundamentals in data structures, algorithms, and databases. Ships reliable, well tested code end to end in **Python**, **TypeScript**, and **Java**, and is eager to learn across any part of the stack.

EXPERIENCE

Software Engineer

Example Corp

Jun 2024 to Present

San Francisco, CA

- Built and shipped **12 REST API** endpoints with **FastAPI** and **PostgreSQL**, cutting average response time by **35%** via query optimization and caching.
- Implemented a **React** and **TypeScript** dashboard used by **500** internal users, increasing weekly active usage by **25%**.
- Raised backend test coverage from **55%** to **88%** with **200+** unit and integration tests, reducing production incidents by **30%**.

Software Engineering Intern

Sample Labs

Jun 2023 to Aug 2023

Remote

- Developed a data ingestion pipeline in **Python** that processed **2M** records per day at **99.9%** reliability.
- Built **3** reusable **React** components adopted across **4** internal tools, reducing duplicated frontend code by **20%**.

Teaching Assistant

Example University

Sep 2022 to May 2023

San Francisco, CA

- Led weekly lab sections for **60** students in an introductory programming course, improving average exam scores by **12%**.
- Held **4** office hours per week and resolved **90%** of student questions without escalation to the instructor.

PROJECTS

- Example Task Tracker (Open Source)** | Full stack task app with a **FastAPI** backend, **React** frontend, **JWT** auth, and **PostgreSQL** persistence.
- Sample CLI Toolkit (Personal)** | A **Python** command line toolkit for batch file processing and **CSV** transformation, packaged for pip with **90%** test coverage.

SKILLS

Languages: Python, TypeScript, Java, JavaScript, SQL

Backend: FastAPI, Node.js, REST APIs, PostgreSQL

Frontend: React, HTML, CSS, Tailwind CSS

Data & Cloud: PostgreSQL, Redis, AWS (EC2, S3, ECS)

DevOps: Docker, GitHub Actions, CI/CD, Linux

EDUCATION

Example University

BS Computer Science, GPA: 3.9/4.0

San Francisco, CA

Aug 2020 to May 2024

- Data Structures and Algorithms, Operating Systems, Databases, Web Application Development, Distributed Systems

LEADERSHIP & AWARDS

- Computer Science Club, President** Sep 2022 to May 2023
Led a student club of **80** members, organizing **10** technical workshops and growing event attendance by **40%** year over year.
- Awards:** Hackathon Winner
